ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the internship program at Harshit Projects. I am thankful for their aspiring guidance, invaluable constructive criticism, and friendly advice during this work. I would like to express my sincere gratitude to my industry mentor and the entire team at Harshit Projects for their continuous support, patience, and for sharing their truthful and illuminating views on a number of issues related to this work.

I would also like to thank the School of Computer Science and Engineering, IILM University, Greater Noida, for providing me the opportunity to undertake this internship as part of my academic curriculum, and for their constant guidance and encouragement throughout the process.

Finally, I express my gratitude to my parents and friends for their blessings and encouragement, without which this internship would not have been successfully completed.

INTERNSHIP COMPLETION CERTIFICATE

Date:- 1st September, 2026

GSTIN: 06ADPPP1415J1ZF

INTERNSHIP CERTIFICATE

TO WHOMSOEVER IT MAY CONCERN

This is to certify that Mr. **Tejas Verma**, a student of **IILM University, Greater Noida, India**, has successfully completed an internship as a **Management and Business Operations Intern** at Harshit Projects.

The internship spanned the period from **01st June, 2026 to 31st August 2026**. During his tenure, Mr. Verma demonstrated professionalism, dedication, effective communication, and a strong willingness to learn and contribute to the organization.

As part of his internship, Mr. Verma gained valuable practical experience in:

- Management and coordination of organizational activities and projects
- Project planning, execution, and progress monitoring
- Business research, analysis, and preparation of management reports
- Team coordination, communication, and stakeholder interaction
- Problem-solving and decision-making in a professional environment
- Understanding organizational processes and management practices

We appreciate the valuable contributions made by **Mr. Tejas Verma** during his internship and his efforts in supporting various organizational initiatives at Harshit Projects. We wish him continued success in his future academic and professional endeavors. **For HARSHIT PROJECTS**

CHAPTER 4: PROJECT DESCRIPTION

4.1 Introduction

This report presents an account of the internship undertaken at Harshit Projects as part of the academic requirement for the Bachelor of Technology programme at IILM University, Greater Noida. The internship provided practical exposure to real-world business operations and management practices within a project-based organisation, allowing theoretical concepts learnt in the classroom to be applied in a live organisational setting. Over the course of the internship, I was involved in various activities related to project coordination, business research, documentation, and stakeholder communication, which helped me develop a well-rounded understanding of how a growing organisation functions on a day-to-day basis.

The internship was designed to bridge the gap between academic learning and industry practice by exposing the intern to actual business and operational challenges, cross-functional teamwork, and structured reporting mechanisms used within the organisation. It was undertaken as a Management and Business Operations Intern for the period of 01st June, 2026 to 31st August, 2026.

4.2 Organization Profile

Harshit Projects, based in Sector 7B, Faridabad, Haryana, is a contracting organisation engaged in earth work and civil work for construction and infrastructure projects. The organisation undertakes project-based assignments that require careful planning, resource coordination, and on-ground execution, and it operates with a lean team structure in which management and administrative functions play a crucial role in supporting field operations. The organisation's work culture encourages interns and new team members to take ownership of tasks and contribute meaningfully to ongoing projects and management activities from an early stage.

4.3 Problem Statement

Like many growing contracting organisations, Harshit Projects faced challenges in coordinating multiple ongoing projects, maintaining consistent documentation, and ensuring smooth communication between the management, site teams, and external stakeholders. There was a need to support the existing team in organising project-related activities, preparing management reports, and ensuring that day-to-day

operations were tracked and reported in a structured manner. The internship aimed to address these operational gaps in a limited yet meaningful capacity.

4.4 Project Objectives

- To understand the end-to-end management and coordination process followed within a project-based organisation.
- To assist in the planning, execution, and progress monitoring of ongoing organisational projects.
- To support business research, analysis, and the preparation of management reports.
- To gain hands-on experience in team coordination, communication, and stakeholder interaction.
- To develop problem-solving and decision-making skills within a professional environment.
- To build an overall understanding of organisational processes and management practices.

4.5 Scope of the Project

The scope of the internship was limited to the Management and Business Operations function of Harshit Projects for a period of three months, from 01st June, 2026 to 31st August, 2026. It included assisting with the coordination of organisational activities and projects, supporting project planning and progress monitoring, conducting business research and analysis, preparing management reports, and facilitating communication with team members and stakeholders. The work did not extend to financial decision-making, legal matters, or strategic policy formulation, which remained the responsibility of the organisation's senior management.

4.6 Technologies and Tools Used

- MS Excel and Google Sheets — for maintaining project trackers, records, and reports.
- MS Word and MS PowerPoint — for preparing management reports and presentations.

- Google Workspace (Docs, Forms, Drive) — for documentation and team collaboration.
- WhatsApp and Email — for stakeholder communication and follow-ups.
- Basic project tracking tools — for monitoring the status and progress of ongoing projects.

4.7 System Architecture / Workflow

Although this internship was operations-oriented rather than technical, the management workflow followed at Harshit Projects was structured as a defined pipeline: (1) Project Initiation — understanding project requirements and scope; (2) Planning — allocating resources and defining timelines; (3) Coordination — aligning site teams, management, and stakeholders; (4) Execution & Monitoring — tracking progress against milestones and updating records; (5) Reporting — preparing management reports summarising status and issues; and (6) Review & Closure — reviewing outcomes and documenting learnings for future projects. Each stage was tracked to ensure visibility across the team.

4.8 Methodology

The internship followed a practical, task-based methodology under the guidance of an assigned mentor at Harshit Projects. During the initial phase, I was oriented to the organisation's structure, ongoing projects, and existing processes. In the subsequent weeks, I was assigned specific tasks related to project coordination, business research, and documentation, with regular check-ins to review progress and receive feedback. Targets were set collaboratively, and periodic updates were shared with the reporting manager to ensure alignment with organisational priorities. This iterative, feedback-driven approach allowed for continuous learning and improvement throughout the internship period.

4.9 Expected Outcomes

- A working understanding of how management and business operations function within a project-based organisation.
- Improved proficiency in professional communication, report writing, and presentation skills.
- Exposure to cross-functional coordination between management and on-ground project execution.

- Development of organisational and time-management skills through structured, deadline-driven tasks.
- A completed internship report and certificate of completion validating the practical learning achieved.

4.10 Certificate of Completion

The Internship Certificate issued by Harshit Projects on successful completion of the internship is attached in Chapter 3 of this report. It confirms the successful completion of the internship as a Management and Business Operations Intern for the period from 01st June, 2026 to 31st August, 2026, along with a formal appreciation of the intern's conduct during the programme.
